**Ten Things You Should Know About “America’s Affordable Health Choices Act”**  
**(H.R. 3200)**

- ❶ The bill **will cost the average person \$460** more in premiums each year.<sup>1</sup>
- ❷ As many as **114 million Americans** may lose their current coverage if the bill passes.<sup>2</sup>
- ❸ Up to **5.5 million jobs may be lost**, according to a model developed by President Obama’s own chief economic advisor.<sup>3</sup>
- ❹ While the Congressional Budget Office claims the bill will cost \$1.28 trillion, it will actually **cost \$9.2 trillion** over the next 75 years.<sup>4</sup>
- ❺ The bill contains **\$820 billion in tax increases**, the largest tax increase in history.<sup>5</sup>
- ❻ Companies that do not provide their employees with a government-approved health insurance plan will be taxed at 8%, **forcing many employers to drop coverage** for their employees.<sup>6</sup>
- ❼ Individuals that do not obtain a government-approved health insurance plan will be **taxed an additional 2.5% of their income**, or \$1,000 for every \$40,000 they earn.<sup>7</sup>
- ❽ After increased income taxes on those making \$350,000 or more, the top tax rate in 39 states will be more than 50%; the highest wage earners in New York will be taxed at 58%, **more than any country in the world**, including Sweden.<sup>8</sup>
- ❾ A family of four with an **income of \$88,200** will qualify for taxpayer-funded subsidies.<sup>9</sup>
- ❿ Even after the plan takes effect, **34% of the estimated uninsured will still lack coverage**.<sup>10</sup>

*This analysis is not designed to endorse or oppose this or any other proposed legislation. Its sole purpose is to discuss the bill’s components in the context of the Center’s research into the topic. The statistics cited herein are current as of August 19, 2009, but are subject to change due to amendments made to H.R. 3200.*
